Presentation of Seedcoin, the world's first seed-stage virtual incubator for Bitcoin startups by :

Hakim Mamoni, co-founder and Chief Technology Officer

Software engineer specialized in financial and banking systems with experience at major banks (London, Luxembourg) and tech entrepreneur in China.

Eddy Travia, co-founder and Chief Startup Officer

Investment professional with ten years experience in managing funds in China and Hong Kong.

The current dynamic, fast-changing world of cryptocurrencies is often compared to the 'internet years'. As in the late 90's and the advent of the internet, the disruptive power of Bitcoin and cryptocurrencies and their potential applications in our everyday lives are similarly generating countless opportunities for entrepreneurs and new business models. Cryptocurrencies are changing forever the way people and organizations interact with money.

Eddy and Hakim have co-founded Seedcoin, an incubator funding and helping cryptocurrency startups such as exchanges, payment processors, trading platforms, software companies to develop around the world. Seven startups are being incubated and seven more to be selected soon. Seedcoin aims to build a worldwide, collaborative network of entrepreneurs, mentors and cryptocurrency experts.

If you are interested to learn more about Seedcoin, its startups and its network and learn how you could get involved join us at the **Eurecom** Campus in Sophia Antipolis on Thursday April 17th at 6.30 pm.

Eddy Travia
Startup Officer
Hong Kong, China
